Why We Believe ProArgi-9+ is the Best of All the L-Arginine Supplements

It's one thing for us to tell you ProArgi-9+ is the best of all the L-arginine supplements. It another thing for the medical community to state:

“ProArgi-9+ is the highest quality l-arginine supplement in the world.”
—Physicians’ Desk Reference (2014), pg. 2571

ProArgi-9+ is listed in both the 2014 & 2015 Physicians' Desk Reference, which doctors use for guidelines on what they recommend to their patients. With 262 quality assurance steps, pharmaceutical grade L-arginine, and other key ingredients, ProAgri-9+ has caught the attention of the medical community for its effectiveness in helping to address cardiovascular concerns.

Click Here For More Information On The 2014 and 2015 Physicians' Desk Reference
In addition to being recognized by the Medical Community here in the United State, ProArgi-9+ is also recognized in other world markets.

Golden Otis Award

In April of 2014, a distinguished body of Poland's top health and medical professionals gathered for the annual Golden Otis Award Ceremony.

At this ceremony, Mr. Radek Baszynski, Synergy WorldWide’s General Manager of Poland & Czech Republic, accepted the Golden Otis Award of Trust on behalf of Synergy Worldwide and ProArgi-9+.

The Golden Otis organization honored Synergy with this award in recognition of ProArgi-9+ as a quality product, highly trusted by polled professionals, consumers, and patients across Poland.

The science and effectiveness of ProArgi-9+ was declared by this organization to be not-only trusted, but also "needed" by men and women around the world.

Best New Product Award

The CAMexpo is the United Kingdom's biggest professional event dedicated to complementary, natural, and integrative health.

At this event all the health care professionals, practitioners, therapists, pharmacists, and health store retailers who attended had the opportunity to vote on the “Best New CAM Product.”

For 2015 that product was ProArgi-9+ from Synergy Worldwide. Paul Flint, one of the Synergy distributors at this expo had this to say,

“Health professionals, especially in the United Kingdom, are familiar with CAMexpo and this award will be a talking point as we introduce ProArgi-9+ to practitioners and therapists in the future.”
In addition to the above awards and recognition, ProArgi-9+ has been used in several clinical studies. It started in 2009 with the High Desert Heart Institute Study in which 33 congestive heart failure patients were put on a Nitric Oxide Therapy Protocol. The product of choice was ProArgi-9+ from Synergy Worldwide. The results of this study were so “remarkable” that ProArgi-9+ was incorporated into the daily operation of this medical facility.

If you click on the image below you can review the study results, protocol, testing procedures, and listen to a 15 minute interview with Dr. Siva Arunasalam discussing this study and how it dramatically impacted their study participants.

2009 High Desert Heart Institute Study

In 2013 ProArgi-9+ was an integral component to the Chicago Sky Study. This was a corporate wellness study with the upper management of the Chicago Sky Women's Professional Basketball Team. Danielle Girdano, the study director commented that the study participants had the greatest gains in cardiovascular health, muscular strength, and muscular endurance of any study she had run prior to incorporating ProArgi-9 Plus.

More recently **ProArgi-9+** has been used in a series of clinical studies coordinated at the **Hughes Center for Research and Innovation**. According to Dr. Matthew Trip, the Center Director, “**our preliminary in vitro and human studies showed that the unique combination of ingredients in our ProArgi-9+ formula enhances the effects of L-arginine within the body in several ways**.”

(Click on the images above to take a tour of the Hughes Center for Research and Innovation.)

**Study #1** - In testing **ProArgi-9+**, Nature’s Sunshine found that its formula significantly and rapidly increases the level of nitric oxide in the body.

The findings of this study are significant because other studies show that aging and poor diet can affect the metabolic systems responsible for producing nitric oxide, causing them to work less effectively. Healthy nitric oxide levels are important for proper vasodilation, along with blood pressure, muscle, heart and central nervous system function.

**Study #2** - Previous studies have shown that l-arginine has no significant effect on myeloperoxidase, an enzyme that inhibits nitric oxide production. Additionally, l-arginine has no significant influence on inhibiting the oxidation of LDL cholesterol. **The Hughes Center’s preliminary study discovered that the unique combination of ingredients found in Synergy’s ProArgi-9+ potently inhibited myeloperoxidase and helps to reduce the oxidation of LDL cholesterol.**

Following these discoveries, **Nature’s Sunshine has filed a United States provisional patent application** to ensure that Synergy maintains exclusive rights to this iconic formula.
Given the unique and proprietary formulation of ProArgi-9+ there are many companies that claim their formulation is better. This competition usually centers in two general categories. **Companies who formulate a product design that uses the L-arginine Pathway** for the creation of nitric oxide like L-Arginine Plus. **Or companies who use a Nitrate/Nitrite Pathway** for the creation of nitric oxide like Neo40, and then claim that the L-arginine pathway is dysfunctional for anyone over the age of 40.

**The following two videos will help you better understand the misinformation promoted by other companies** in their attempt to create sales for their products. We believe you'll find an open and accurate discussion of facts when you view these videos. This will allow you to make your own determination as to **which product and nitric oxide pathway is best for improved cardiovascular health.**

**Click on each image below** and the video will play:

If you want information on the **Quality Control Standards** used by Synergy Worldwide and their parent company Nature's Sunshine Products in the manufacturing of all their products, then **click on the image below:**
And last but not least is how ProArgi-9+ benefits those who use this product. If you click on the image below you can read the testimonials of just a sampling of the thousands who have benefited from ProArgi-9+.

ProArgi-9+ is recognized by the 2014 & 2015 Physicians' Desk Reference as “the highest quality L-arginine supplement in the world.”
