

Nitric Oxide Therapy Brought to You by Our Exclusive Synergy Family

Quality Assurance Standards

Quality assurance standards are critically important if you want your nutritional supplement to consistently deliver results. It's one of the reasons why we've chosen **ProArgi-9+** from Synergy Worldwide to properly nourish your endothelium for improved nitric oxide production.

Synergy Worldwide is a wholly owned subsidiary of Nature's Sunshine Products (NSP), an industry giant founded in 1972. NSP scientists worked with Synergy and Dr. J. Joseph Prendergast to oversee the design, manufacturing, and production of **ProArgi-9+** utilizing quality-control mechanisms comparable to those used in the pharmaceutical industry.

ProArgi-9+ was introduced to the market in 2008. A total of 262 quality assurance steps go into the manufacturing of this product. It's one of the reason why the 2014 / 2015 Physicians' Desk Reference states that **“ProArgi-9+ is the highest quality L-arginine supplement in the world.”**

Additionally, it's one of the few nutritional supplements with a **120 Day Quality and Potency Guarantee** or your money back. As Lynda Hammonds, Vice President of Quality Assurance and Regulatory Affairs likes to say,

“We don't guess. We test. We guarantee.”

The following two videos will provide you with addition information about Synergy Worldwide and Nature's Sunshine Product's commitment to quality assurance standards second to none in the nutrition industry.
