

## Testimonials

Can ProArgi-9+ help everyone improve their cardiovascular system? We don't make that claim.

But we do believe it's the best of all the L-arginine supplements for the production of nitric oxide. **And, we believe Nitric Oxide Therapy can be an integral part of everyone's wellness program.** In fact Our Mission is to eliminate heart disease and we believe Nitric Oxide Therapy is the key.

It's been amazing to see the results in our clients who have used **ProArgi-9+** to help them address cardiovascular concerns, athletic performance, high blood pressure issues, and other areas of human performance. **Here are just some of the ways we've been able to help people.**

### **Donald Clarke – Severe Peripheral Arterial Disease**

As an avid golfer Donald was able to walk 18 holes of golf at his local club without any issues. **Then in 2004 something changed.** He could only walk 5 to 6 holes before his legs would ache so badly that he had to use a golf cart.

After seeing several doctors and specialists Donald was given an Ankle Brachial Index test in June of 2007. It was confirmed that **he had severe Peripheral Arterial Disease, 41% in the right and 31% in the left.** When placed on an L-arginine protocol he showed considerable improvement.

**Now Nitric Oxide Therapy thru ProArgi-9+ is part of his daily routine.** He loves what it has done for him. A recent follow-up visit at his health clinic showed that **even though Donald is 66 years old his arteries are now as clear as a 29 year old.**

## Sherry Hammer – High Blood Pressure

When I was first introduced to Nitric Oxide Therapy **my blood pressure averaged 160 over 90**. I was faced with a decision to go on medication or try this natural supplement called **ProArgi-9+**. I decided to give this product a try and **now my blood pressure consistently averages 112 over 68**. Needless to say I'm extremely relieved and happy to have found this product.

## Jennifer Smestad – Miss Arizona

Jennifer was recently crowned Miss Arizona. **She uses Nitric Oxide Therapy to help her maximize her results in the gym.** In discussing **ProArgi-9+** she had this to say,

**“Before every workout I take ProArgi-9+ and ProArgi-9+ Active mixed together and it makes me feel so much better during workouts. I want to keep going, I am so much more active, I have so much more**

**endurance. . . and that is great to have, because preparing for a swimsuit competition on the Miss America stage is difficult. So it's good to have that extra boost that ProArgi-9+ helps me with. I love it.”**

## Rene La Montagne – High Blood Pressure

My doctor introduced me to the world of Nitric Oxide Therapy. **At the time my blood pressure averaged 170 over 110** while on two medications. I was facing the possibility of a 3<sup>rd</sup> medication when **my doctor handed me a canister of ProArgi-9+** and recommend that I try this before starting on any additional medications.

**Under the supervision of my doctor** I began using this product and **within 18 months I was off 6 prescriptions** and my blood pressure was back in the normal range.

I no longer suffer from high blood pressure, headaches, nosebleeds, metabolic syndrome (pre-diabetes), insomnia, restless legs, candida outbreaks, herpes outbreaks, acid reflux, or depression. I even lost 20 pounds in that first six months!

## Debbie Miller – Multiple Sclerosis

I was diagnosed with Multiple Sclerosis in 2001 and worked very hard not to let that define me. Try as I might, there was only so much I could do and I was losing the battle. **Fatigue, cognitive problems and bowel & bladder disorders are common symptoms** and ones that had become particularly challenging for me.

I tried a few prescriptions to help relieve the symptoms, but they had side effects that brought new, different challenges.

Luckily, I decided to listen to a friend of mine who insisted that I try **ProArgi9+**. After two weeks on PA+, my energy improved. I was sure I was dreaming or that it was a “placebo effect”. **After six weeks, I was thinking more clearly than I had in years, and I was able to expand my productivity from 3 hours a day to 8, and then 10!** I got my life back!

I have been on PA+ since July 2012 and am gaining new benefits all the time. The last visit to my neurologist confirmed that my vitamin D numbers have shot up from 25 to 111. High levels of vitamin D are unheard of in the world of MS. I can't wait to see what new surprises are in store! What is your health challenge? **Is it worth a 120 day, money back guarantee?**

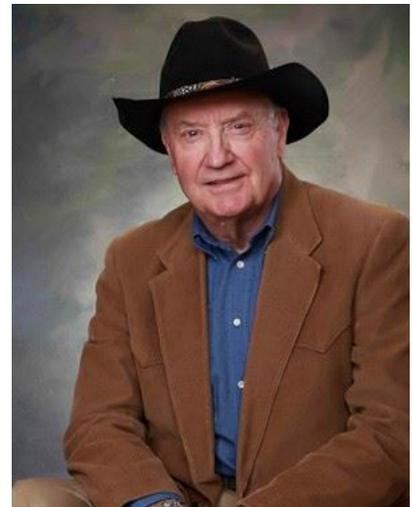

## David Perkkio – Chronic Fatigue

I live in Cody, Wyoming. This letter comes as a testimonial for the benefits of using a health supplement called, **ProArgi-9+** commonly known as L-Arginine a dietary supplement.

**I was bitten by a Brown Recluse spider in 2002** that took my life and health away leaving me disabled with multiple organ failures and many other medical issues. Recovery was not expected and if so, I would be left with disabilities.

**For 10 years I had chronic fatigue that left me exhausted** and bedridden one third or more of my days. I was identified as disabled with many medical issues and would be monitored as an outpatient for life. My outlook was very grim.

**Two years ago I was introduced to Arginine.** Although I remain with many medical issues surrounding my multiple organ damage, **the benefits of Arginine has been amazing.** Today I no longer spend my days in bed. **Much of my energy has returned and I am now productive and very alert once again.** I am able to remain on my feet most of the day and have returned to many outdoor activities. Without Arginine this would not have been possible. At age 69 I am independent without assistance from others and able to continue living in the country alone. Without hesitation I would recommend this product to anyone who has issues with fatigue or lack energy. I truly believe this product has given me most of my life back to live as normal a life as possible.

## George Pearce – Heart Issues

I'm a retired businessman here in Canada and I would like to share with you how **Nitric Oxide Therapy changed my life**. Now before I start I want you to clearly understand that the results I've experienced is no guarantee that you will experience the same. And, in no way am I asking you to do something counter to your doctor or the medical community.

**We all make choices in life.** For me my choices caused me distress when I was admitted to the hospital in May of 2011. I had shortness of breath, sweating, and chest pains. An angiogram revealed plaque blockages in my arteries and two stents were inserted.

Well I continued my lifestyle and **in March of 2014 I suffered from the same symptoms**. I was sent for another angiogram. This time I had **7 blockages ranging from 40% to 80%**. My doctor informed me that I needed open heart surgery if I was going to live out the year.

My surgery date was set for May 5<sup>th</sup> but I was extremely concerned because I had friends that didn't make it through their open heart surgery. I started to do research online about my situation and came across Nitric Oxide Therapy as a method to help improve cardiovascular health.

I decided to cancel my surgery, which my physician was not at all happy about. But I had done my research and found a product that the medical profession actually recognizes "**as the highest quality L-arginine supplement in the world**", which is what's needed to create this nitric oxide.

I decided to use this product. At no time did the company or any of their representatives tell me this product would solve my problem. But I had seen enough in this area to give this a chance to see if I could benefit.

After taking this product for 30 days my symptoms cleared up. No more sweating or chest pains. As I continued to apply Nitric Oxide Therapy my energy returned and I felt good. I was able to do physical activities that I couldn't do before. Needless to say my wife and I were very encouraged.

Even my physician saw my physical improvement but still believed I needed the by pass surgery. **He and I finally agreed to have another angiogram performed** to see if this Nitric Oxide Therapy program was actually improving my blockages. However, my cardiac surgeon required me to sign a legal agreement that if my blockages were still the same or worse that I would have open heart surgery right away. We scheduled the procedure. I signed the legal agreement and the angiogram was performed on August 6, 2015.

**To everyone's surprise the angiogram showed that the blockages of plaque had improved by 20% and that I no longer needed open heart surgery.**

What a relief. I've been taking this product for over a year and I'm 100% sold on what it has done for me. Again, I make no promises that this product will help you as it helped me.

**ProArgi-9+ is recognized by the 2014 & 2105 Physicians' Desk Reference as "the highest quality L-arginine supplement in the world."**
